

# Hamaton | How to Perform an OBDII Relearn with the Hybrid HT Tool

Choose SERVICE TPMS on the main menu

Select the vehicle's MAKE

Select the vehicle's MODEL

Select the vehicle's YEAR OF MANUFACTURER

Choose RELEARN

Choose OBDII RELEARN

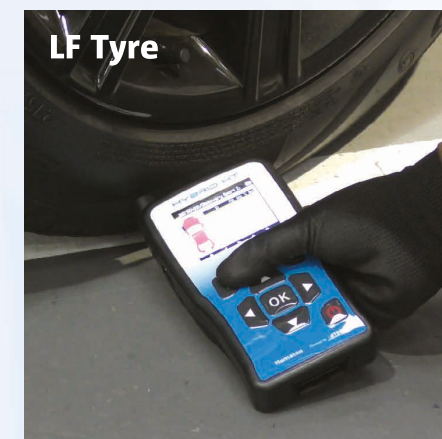

Take a glance at the instructions

Select the number of wheels (if applicable)

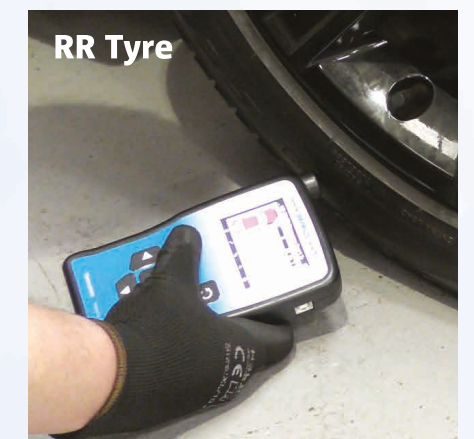

Start with the LF (left front) tyre

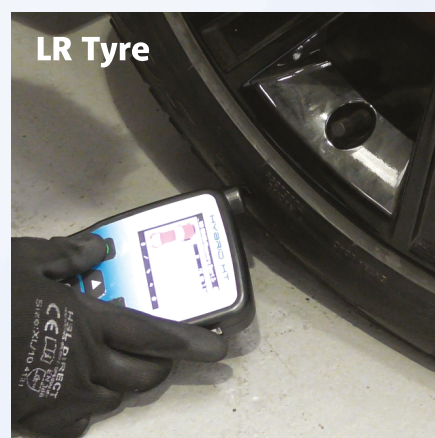

Place the tool on the sidewall near the valve, then press the green trigger button

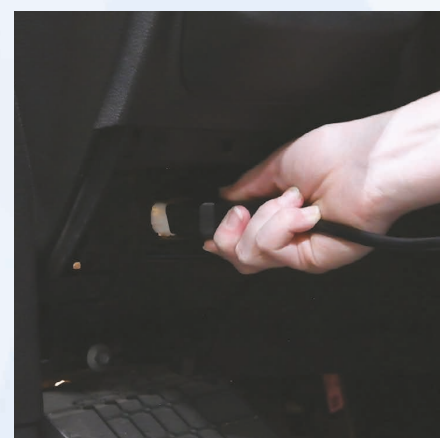

Repeat for the RF (right front) tyre

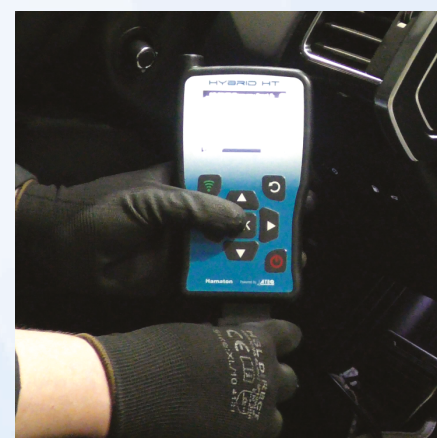

Repeat for the RR (right rear) tyre

Repeat for the LR (left rear) tyre

Plug in the connector to the vehicle's OBDII port

Connect the opposite end of the connector to the tool

Press OK with the ignition ON

The tool will display TRANSFER SUCCESSFUL if the relearn was a success
